**12 pt Cover**  
Points are used to indicate the thickness of each sheet of paper. Points are measured simply by using calipers to measure the thickness. Each point represents 1/1000th of an inch. Some examples of common point sizes, and how they might be written are as follows: 8 pt, 10 pt, 12 pt, 14 pt, and 16 pt paper.

**Paper Weight - Thick and Thin, Points and Pounds**  
Cardstock is sometimes called pasteboard or cover stock and is often used as a heavy paper option. 12pt card stock is a more durable and much thicker than ordinary printing paper or writing paper. 12pt Cardstock is also more versatile than other kinds of paperboard of a similar size. They're sold in sheets (as opposed to paper reams).

**What Is Cardstock Paper? Defining Thickness, Weight, and ...**  
When selecting a paper stock keep in mind the equivalents to each paper choice available. This will be able to tell you how thick the paper will be and assist you in making the right selection. Note that Bond, Text, and Cover are usually in LB. If for example the paper stock is a 14 pt. cover, then it used points (pt) and not pounds (lbs).

**Paper Weight Comparison Chart**  
Sometimes thicker paper isn't practical for certain printing projects. That leads us to our thinner, green option – 100lb (or 12 pt) recycled paper stock. This paper is durable yet light, while still managing to hold color well. It's the most economical option and is commonly ordered with a gloss cover.
