System Diagram

The integrated fire control allowed the gunner with the best view of an attack to control the appropriate turrets. Also, if a gunner was incapacitated, another crewman could operate his turrets. This diagram shows which turrets each gunner could control. The GE fire control system provided valuable protection for the

Engine problems where the governor is suspected to be the cause, may actually be the result of other engine system problems. Hunting (engine R.P.M. surging up and down) indicates that the engine is incapable of maintaining a constant R.P.M. with or without an engine load. Engine overspeeding (either with or without throttle
