Ugarit - Wikipedia

The Ugaritic alphabet is a cuneiform abjad (consonantal alphabet) used from around either the fifteenth century BCE or 1300 BCE for Ugaritic, an extinct Northwest Semitic language, and discovered in Ugarit (modern Ras Shamra), Syria, in 1928.It has 30 letters. Other languages (particularly Hurrian) were occasionally written in the Ugaritic script in the area around Ugarit, although not elsewhere.

Ugaritic alphabet - Wikipedia

Over the past few years, neural networks have re-emerged as powerful machine-learning models, yielding state-of-the-art results in fields such as image recognition and speech processing. More recently, neural network models started to be applied also to textual natural language signals, again with very promising results. This tutorial surveys neural network models from the perspective of ...

Language, comprising as it does of groups and blends of words, is the prime method for correspondence between individuals. Obviously, language is by all account not the only method for correspondence, yet it is the centrepiece of correspondence in human culture. Language is understood by people in terms of their own social and cultural backgrounds.
