The .gov means it's official. Federal government websites often end in .gov or .mil. Before sharing sensitive information, make sure you're on a federal government site.

Tables Created by BLS

A computer program is a collection of instructions that can be executed by a computer to perform a specific task.. A computer program is usually written by a computer programmer in a programming language.From the program in its human-readable form of source code, a compiler or assembler can derive machine code—a form consisting of instructions that the computer can directly execute.
