Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is

AP Biology Unit 8 Chapter 40 Flashcards | Quizlet

Marine biology is the scientific study of the biology of marine life, organisms in the sea. Given that in biology many phyla, families and genera have some species that live in the sea and others that live on land, marine biology classifies species based on the environment rather than on taxonomy.. A large proportion of all life on Earth lives in the ocean.

Jane Loudon, the Mrs Beeton of the Victorian gardening world, wrote several popular books on horticulture and botany specifically for women. In the 18th century, botany books were mostly written for a female audience. Women were encouraged to study botany as it was considered to be an acceptable activity for women. Author(s): Jane Loudon
