There are four possible types of interactions among individuals living together in a population. First, cooperation or mutualism, in which both the participants gain from the act as in the nest building by both male and female birds, or cooperation in the colony of social insects. Second, altruism in which the actor (individual that carries out the action) pays fitness cost to the recipient ...

A carbonated beverage, like a soda pop, is packed full of carbon dioxide gas that is dissolved into the soda solution. All of the bubbles in a soda pop that make you burp come from the dissolved carbon dioxide gas, which forms bonds with water. While the soda is in the bottle, the gas is kept in solution by the pressurized conditions inside the bottle.
