Air pollution is the contamination of air due to the presence of substances in the atmosphere that are harmful to the health of humans and other living beings, or cause damage to the climate or to materials. There are many different types of air pollutants, such as gases (including ammonia, carbon monoxide, sulfur dioxide, nitrous oxides, methane, carbon dioxide and chlorofluorocarbons ...

Air pollution - Wikipedia

We recently decided to show a movie to our 6th, 7th and 8th grade students on the last day of school. But when we started brainstorming ideas we had some difficulty coming up with movie titles that (a) the students would like and (b) we thought would be worth showing.. Listed below are the movies we came up with after consulting a variety of experts including: current middle school students ...
