Everett Lee proposed a comprehensive theory of migration in 1966. He begins his formulations with certain factors, which lead to spatial mobility of population in any area. These factors are: (i) Factors associated with the place of origin, (ii) Factors associated with the place of destination, (iii) Intervening obstacles, and (iv) Personal factors.

The mining industry in India is a major economic activity which contributes significantly to the economy of India. The GDP contribution of the mining industry varies from 2.2% to 2.5% only but going by the GDP of the total industrial sector it contributes around 10% to 11%. Even mining done on small scale contributes 6% to the entire cost of mineral production.
