To care for baby goats, make sure they're getting milk for the first 8 weeks after they're born. If the goats aren't getting milk from their mother, you can bottle feed them instead. Once the goats are 30 days old, start to wean them off of milk by slowly introducing hay, grain, and water into their diet.

Undress your baby and then place him or her in the water immediately, in a warm room, to prevent chills. Make sure the water in the tub is no more than 2 to 3 inches deep, and that the water is no longer running in the tub. Use one of your hands to support the head and the other hand to guide the baby in feet-first.
