An artificial intelligence (AI) is an artificial construct that exhibits intelligence similar, and in some categories far superior, to a sapient biological being.AI technology was used by the Forerunners, and was later developed by humanity.According to the Forerunner Technological Tier ranking system, the extensive use of AI is one of the components for sociological and technological advancement.

Artificial Intelligence - Halopedia, the Halo wiki

The theory of multiple intelligences proposes the differentiation of human intelligence into specific "modalities of intelligence", rather than defining intelligence as a single, general ability. The theory has been criticized by mainstream psychology for its lack of empirical evidence, and its dependence on subjective judgement.
