Evolutionary thought, the recognition that species change over time and the perceived understanding of how such processes work, has roots in antiquity—in the ideas of the ancient Greeks, Romans, and Chinese as well as in medieval Islamic science. With the beginnings of modern biological taxonomy in the late 17th century, two opposed ideas influenced Western biological thinking: essentialism ...

These notes began as I taught Biology 103, the basic plant families course, at Harvard, taking over from Carroll E. Wood, Jr. (an impossible task). They became more wide-ranging when I twice taught OTS "Tropical Plant Systematics", and when I attempted to deal with all families in a one-semester, graduate-level course at Harvard.

Angiosperm Phylogeny Website

Galen contributed a substantial amount to the Hippocratic understanding of pathology. Under Hippocrates' bodily humors theory, differences in human moods come as a consequence of imbalances in one of the four bodily fluids: blood, yellow bile, black bile, and phlegm. Galen promoted this theory and the typology of human temperaments. In Galen's view, an imbalance of each humour corresponded with ...
