Kenwood Amateur Radio Service Bulletins By Model NumberNote

The final Kenwood hybrid (TS-520) used 5 amps when receiving, compared to 1.9 amps on the TS-440. Pure tube radios could use even more. Largely this was due to the need to bring a tube up to a certain temperature, which also meant that the frequency produced by a tube final could drift as the temperature was reached, and would also drift if the ...

The radio firmware revision of some of these radios may require the use of Kenwood-Slow rather than Kenwood. TS-2000

Supported Radios - N1MM Logger Plus

Just received the manual for my old Kenwood TS-130 the other day and I must admit that it is actually better than the original service manual. Pete does an outstanding job and his work is worth more than what he charges in my opinion. ManualMan is truly a valuable asset and I hope that he prospers for a very long time. Thanks Pete, great job.
