Rehabilitation In Managed Care Controlling

According to Sandstrom et al., rehabilitation bridges the gap between the health care system and the community and rehabilitation needs to focus on care. Medical rehabilitation provides restorative services to individuals who acquire an impairment from a congenital condition, a traumatic injury, an acute illness, or a chronic health condition that limits the individual's ability to function independently.

Pain management, pain medicine, pain control or algiatry, is a branch of medicine that uses an interdisciplinary approach for easing the suffering and improving the quality of life of those living with chronic pain. The typical pain management team includes medical practitioners, pharmacists, clinical psychologists, physiotherapists, occupational therapists, physician assistants, nurses, and ...

Pain management - Wikipedia

Though the roots of managed care lie in cost containment efforts, its future depends on a shift in emphasis to quality of care. Clinicians must become partners with insurance companies and employers to evolve a "win-win" scenario that combines efficiency with effectiveness or risk both exclusion from provider networks and loss of control over what becomes incorporated into standards of care.
