Many new proposals for scene text recognition (STR) models have been introduced in recent years. While each claim to have pushed the boundary of the technology, a holistic and fair comparison has been largely missing in the field due to the inconsistent choices of training and evaluation datasets. This paper addresses this difficulty with three major contributions. First, we examine the ...

of object categories [12,25]. In this paper, we are con-cerned with a classic problem in computer vision: image-based sequence recognition. In real world, a stable of vi-sual objects, such as scene text, handwriting and musical score, tend to occur in the form of sequence, not in isola-tion. Unlike general object recognition, recognizing such
