very small number
easier to manipulate
and to understand.
Converting numbers
from one metric prefix
to another is a
common task in many
areas of science. For
example, a lab may
stock a 10 gram per
liter (g/l) solution of
glucose, while a
particular procedure
may require a 100 $\mu\text{g/l}$
of glucose solution.

A metric prefix is a unit prefix that precedes a basic unit of measure to indicate a multiple or submultiple of the unit. All metric prefixes used today are decadic. Each prefix has a unique symbol that is prepended to any unit symbol. The prefix kilo-, for example, may be added to gram to indicate multiplication by one thousand: one
