What are the reasons the engine doesn't start: There are a number of reasons if your car or bike's engine doesn't start. We can split these into the issues related to the electrical system, fuel system (Petrol / Diesel) or a mechanical breakdown inside the engine. The troubleshooting diagnosis for Petrol and diesel engines differ from each other.

Troubleshooting Guide: Top 10 reasons why the engine doesn't ...

The development of the steam engine provided a reason to compare the output of horses with that of the engines that could replace them. In 1702, Thomas Savery wrote in The Miner's Friend: So that an engine which will raise as much water as two horses, working together at one time in such a work, can do, and for which there must be constantly kept ten or twelve horses for doing the same.

Horsepower - Wikipedia

7. Engine has Oil Lubrication Issues. While the top six reasons above can be easily resolved and diagnosed in most cases, this one is rather tricky. Your engine needs oil to keep all those moving parts cool as it revs up. Sometimes, dirty oil, engine sludge, or a damaged oil pump can cause oil pressure to reduce or increase higher than it should.

10 common reasons for an engine management light. 1. Mass airflow sensor. Risk of damage Low What to do Drive at reduced speed to the nearest garage. The mass airflow sensor measures the quantity of oxygen coming into the engine. Too little and the engine will run badly.

Engine management light: 10 reasons why check engine ...

Jones says engine damage is likely occurring when this light comes on. A couple of reasons the light could come on include when the oxygen sensor or the catalytic converter needs to be replaced “You would be wise to bring in your vehicle to have it diagnosed,” he says.

5 Causes of Car Engine Failure | Angie's List

For many kinds of equipment (with automotive engines being the prime example), the time it takes to complete break-in procedures has decreased significantly from a number of days to a few hours, for several reasons. The main reason is that the factories in which they are produced are now capable of better machining and assembly.

Break-in (mechanical run-in) - Wikipedia

There are a couple of reasons why a big 4.0-liter engine has eight half-liter cylinders rather than one big 4-liter cylinder. The main reason is smoothness. A V-8 engine is much smoother because it has eight evenly spaced explosions instead of one big explosion. Another reason is starting torque.
