The Handbook Of Historical Sociolinguistics
Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society.Sociolinguistics overlaps considerably with pragmatics and is closely related to linguistic ...

Variation is a characteristic of language: there is more than one way of saying the same thing. Speakers may vary pronunciation (), word choice (), or morphology and syntax (sometimes called "grammar").But while the diversity of variation is great, there seem to be boundaries on variation – speakers do not generally make drastic alterations in sentence word order or use novel sounds that are ...

A toolbox for analysing political texts. Discourse analysis is a useful tool for studying the political meanings that inform written and spoken text. In other posts, I have provided a quick video introduction to the topic, and have discussed the ideas behind discourse theory, the main questions that students and researchers will likely ask as they set up their discourse analysis project, and ...

The "pretty patterns" derided here are characteristic of structuralist analyses. Sociolinguistics, which is much closer in spirit to Sapir's project, studies the influence of social and linguistic structure on each other. One particularly influential study, Labov (1966), examines the influence of social class on language variation.
