Weather - BrainPOP

The precipitation scale, in centimeters per year, is the average of the total precipitation for a typical year. For example, Phoenix, Arizona, a subtropical desert, has an average temperature of 29.2° C (84.6 °F) and receives an average of 21 cm (8.3 in) of rain per year.

4A: Introduction to Biomes

Weather is the state of the atmosphere, describing for example the degree to which it is hot or cold, wet or dry, calm or stormy, clear or cloudy. On Earth, most weather phenomena occur in the lowest layer of the planet's atmosphere, the troposphere, just below the stratosphere. Weather refers to day-to-day temperature, precipitation, and other atmospheric conditions, whereas climate is the ...

It's also a wonderful educational website for teachers and parents to give them the right tools to explain the different types of weather to children.

Weather Wiz Kids | Because weather is awesome

Antarctica's climate is also very windy and dry. Wind speeds vary across the continent and are discussed in Regional climate variation and weather; but the idea that Antarctica is a kind of desert requires some explanation here. The relative humidity of air at the South Pole is often as low as 0.03%, and the continent is a polar desert. This may at first seem surprising with 99% of its area ...

Antarctica's climate: the key factors - Discovering Antarctica

Precipitation. Precipitation is just a big word to describe how water falls to the ground. It can be rain, snow, sleet, ice, hail, or drizzle. The form these water or solid particles take depends on other weather factors. For example, if the temperature is cold, below 32 degrees, precipitation comes to the surface in the form of snow.

Common Types of Weather Conditions - Your Dictionary

Weather is the present condition of a place with respect to the atmospheric pattern determining the pressure, precipitation and hotness or coldness of that area. It is determined by the temperature, humidity, rainfall, wind speed etc. Sun is the most influencing factor of the weather. Climate is the average weather pattern of a place taken over a period of 25 years.
